

The OM-SD2 Siran Alarm is a reliable alerting device designed to deliver high-decibel audible warnings with visual indication for effective on-site notification. It serves both as a deterrent against intrusion and as an immediate alert mechanism for administrators. Featuring a dry contact interface, the alarm enables remote activation and seamless integration with monitoring systems. When triggered at remote locations, it provides instant on-site awareness, allowing administrators to respond promptly to anomalies and potential security threats.

Key Features

Design	Sleek, streamlined design with decorative appeal
Warning Light	Universal red warning light for strong visual deterrence
Housing	ABS enclosure with flame-retardant properties
Installation	Multiple mounting options for flexible deployment
Audio Output	Independent high-decibel speaker for loud alarm volume
Application	Suitable for corridors, windows, and other areas; aesthetically pleasing with powerful sound
Self-Diagnostics	Anti-tamper protection; periodic self-test with status reporting to alarm host
System Integration	Provides arming/disarming acknowledgment sounds; compatible with hosts, door contacts, emergency buttons to provide high-decibel distress signal and act as deterrent
